Qualitative interviews on self-agency

- Five year participation in the Stayer-study
- «Long-term recovery»? «Rehabilitation»? «Aftercare»?
- Substance/ alcohol»free», employment/education, social network
- Reasons for positive life-changes over a long period of time?
- Two interviewers with experience

- Aleksander Skålevik

Background:

- User experience
- Differerent treatments
- Earlier participant in the Stayer - study

Roles today:

- Drop - out team Stavanger hospital
- Varatun District psychiatric Hospital
- Co -researcher inn KORFOR

Positive sides of using a co - researcher with user experiences?

- Trust
- Honesty
- Similar background
- Rom for reckognition

«Negative» sides of using a co - researcher with own user experiences?

- Participant could try to say the right things to satisfy me
- Closing the reflection processes
- The grounding of ones` user experience is mainly subjective
